

The Tale of Two SharePoint® Users

WHY CHOOSE BAMBOO®?

↑ 12

Ben and Stan work for two different companies in the same building and, unbeknownst to them, share many similarities. They both love cucumber sandwiches and are well-versed in SharePoint®, relying on the tool heavily in their day-to-day activities. There is one difference, though: Ben uses solutions from Bamboo. Stan doesn't. Let's see what difference that makes in their days.

WITH BAMBOO

WITHOUT BAMBOO

Calendar Plus

Ben's customized, color-coded unified calendar ensures that he is always on track with his projects.

Having to manage multiple disjointed calendars, Stan feels like he's always playing catch-up in his projects.

Alert Plus

Thanks to the Alert Plus filtering feature, Ben immediately saw an alert on the latest revision of a crucial presentation. He is now in the process of finalizing the document.

The alert on the presentation is lost among Stan's many notifications. He is still waiting on his manager to let him know he has provided Stan with feedback.

File Share Library

Through File Share Library, Ben has access to the relevant and up-to-date documents he needs, all organized in a familiar File Explorer view.

Stan is clicking through folders and asking co-workers to send him documents to gather the necessary data for the presentation.

Chart Plus

With perfectly formatted, interactive charts embedded into his team's SharePoint site, Ben successfully presents his data-informed ideas to the leadership team.

Stan spent too much time figuring out his charting tools and could not prepare with a visually appealing presentation. He is now having a hard time winning over the leadership team.

Ben is enjoying his cucumber sandwich and casually coming up with some great ideas — just like the one he had about choosing Bamboo.

Stan doesn't have time for luxuries like food and he is stuck in his office, frustrated for not having an easier way to get work done.

**THE MORAL OF THE STORY?
DON'T BE LIKE STAN, GO WITH BAMBOO.**
